Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Umiker (US 5,829,617). Regarding claim 1, see Figs. 1-15, where the structure is shown. The hinges of two of the walls are above the hinges of the other two walls. See Figs. 4a and 4 b where 15 and 12 are the flanges. 6 in combination with 15 will limit the horizontal movement. See Figs. 5 and 6 where the latch and striker structure is shown. 29 is beveled.

Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Ogden et al (US 6,293,418). See Fig. 28 where the flanges are 104e and 105e. See Fig. 29, the walls will have limited movement due to the interaction of 92e and 104e and the structure on the opposite end of 92e. The hinges of two of the walls are above the hinges of the other two walls.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Smyers et al, Jacques et al, and Overholdt et al are all cited for teaching folding containers.
